Height: 3 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 4b

Description:

A compact, hybrid, broadleaf evergreen that is clipped and maintained in a perfect pyramidal form; makes a great accent or garden detail plant, very popular and one of the hardier varieties

Ornamental Features

Green Mountain Boxwood (pyramid form) is primarily valued in the garden for its distinctively pyramidal habit of growth. It has rich green evergreen foliage. The small round leaves remain green throughout the winter.

Landscape Attributes

Green Mountain Boxwood (pyramid form) is a dense multi-stemmed evergreen shrub with a distinctive and refined pyramidal form. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub, and can be pruned at anytime. It is a good choice for attracting bees to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Green Mountain Boxwood (pyramid form) is recommended for the following landscape applications;

- Accent
- General Garden Use
- Topiary
- Container Planting

Planting & Growing

Green Mountain Boxwood (pyramid form) will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This particular variety is an interspecific hybrid.

Green Mountain Boxwood (pyramid form) makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.
